

MISSOURI SOCIETY OF PROFESSIONAL SURVEYORS

Surveying the Riparian Tract-Some Considerations

Wednesday, June 15, 2022

VIRTUAL

Dr. Dick Elgin, PS, PE
Archer-Elgin Engineering & Surveying, LLC
Rolla, MO

AGENDA

8:30 - 9:00 am REGISTRATION/SIGN-IN OPENS

9:00 - 12 noon SURVEYING THE RIPARIAN TRACT

The basics of riparian boundaries such as erosion, accretion, avulsion and their effects on title are well known. But: (1) What about the description that says, "to the bank then along the bank?" Where's the boundary? (It could very easily not be the bank.) (2) How can one write a boundary description of a tract when the riparian boundary, the river, moves? (3) How can the acreage of a riparian tract be calculated and reported? (4) Where is the "center" or thread of the stream? (5) What is the difference between navigability for title and regulatory navigability? Might this small stream be subject to some government regulation? (Yes, easily could be.) Answers to these and other questions from the author of the new book *Riparian Boundaries for Missouri*.

*There will be handouts for this seminar, but much of the lecture materials will be from Dick's new book "Riparian Boundaries for Missouri" which can be purchased prior to the seminar from MSPS. This seminar is well suited for LSIT's, comity applicants for a Missouri license, surveying students or PLS's who wish to earn PDU's and expand their knowledge of riparian boundaries.

**THE MISSOURI BOARD FOR ARCHITECTS, PROFESSIONAL ENGINEERS, PROFESSIONAL LAND SURVEYORS
AND PROFESSIONAL LANDSCAPE ARCHITECTS HAS REVIEWED AND APPROVED THIS COURSE FOR 3.0 PDU'S.**
